# Project A.D.A.M. (Algorithmic Data Assessment Matrix)

with Jeffery Boston Weatherford and Adam Marshall

For struggling FX and Futures traders who want to take their trading to levels most will never reach not only passing funded evaluations and compounding personal accounts, but taking these concepts to the extreme and pursuing returns on a professional level....

## Why I Created Project A.D.A.M. (Algorithmic Data Assessment Matrix)

- This program exists because I want to help traders become exceptional with their trading and then go compete for the top of the leaderboard charts on prop firms.
- This is for struggling traders who want to know the deeper mechanics of the market, who are extremely coachable and absolutely determined to make trading work, but can't seem to pass their funded challenges, keep blowing their accounts, and are generally frustrated with the results they are getting.
- This program helps traders gain a mastery of the markets with precision trading techniques you won't find on YouTube or TikTok, plus a deep mastery of self, being taught psychology directly by Adam Marshall, the #2 ranked FTMO trader.
- This package is for traders who want to perform at top-tier levels and maintain that intensity moving forward, working toward results most traders never seriously pursue.
- After completing the training, the objective is a meaningful increase in your average trade RR, moving from the 1:2 range toward 1:10+ setups as you take consistent, focused action on the education we offer.
- We will create a custom trading plan designed specifically for you once you complete the training, tailored to your schedule and goals.

## If that's you, here's what awaits you inside Project A.D.A.M.

### #1 Trading Psychology Enhancement

With our Neurotrader 2.0, you isolate, fill, and eliminate the pitfalls you previously, and most likely unconsciously, dug for yourself.

You can have a winning strategy, but if you don't have a winning trading psychology to go with it, you will continue to be unsuccessful.

### #2 Advanced Precision Trading Education

You get access to the 9 hours of education from the "basic" bootcamp, plus an additional 13 hours of higher-level mentorship that works through those concepts in far greater depth and reveals more of the underlying market mechanics.

The mechanics revealed in this package are the same mechanics I taught Adam Marshall before he became the

## #2 ranked FTMO trader globally, pulling $25k out of the market in a two-week period, a 25% gain on his trading account. Results like these reflect individual execution and circumstance and are not a promise of similar outcomes.

## #3 Exclusive Custom Indicators and Signals

Trading blind will be a thing of the past. We don't trade subjectively or assume an area in the market is important. With our indicators, you can see where the areas of highest probability are. Once you see what we see, you can approach reversals with tight stop losses and high reward using mechanical processes and objectivity. Beyond the indicators, this package includes access to AI analysis systems that wait until market conditions are right before sending potential setups to you. Discernment and using the education alongside these signals is what makes them useful.

## #4 Elite Trading Community

You get access to our exclusive trading community. Trading is a lonely journey that can, at times, be isolating. With a supportive community, you meaningfully increase your chances of sticking with the process. Being surrounded by people with the same mindset and goals helps you achieve those goals yourself. They say if you hang around 5 broke people, you will be the sixth. On the opposite end, if you're around 5 successful people, you will be the sixth.

## #5 Ongoing Mentor Support

Many so-called trading community leaders will guide you out to deep water, but once you pay their membership fee, they are nowhere to be found.

In our community, we make sure we are present to answer our mentees' questions. An active mentor brings clarity to your journey and makes certain you understand the education well enough to navigate the market confidently.

## The Duration

It is self-guided, so it can be as long or as short as you make it. However, we do recommend you take AT LEAST a week to study each concept before moving on to the next, and that you stay on paper trading accounts until you gain absolute confidence in the mechanics taught.

## The Investment

Just $5,000 for lifetime access to the entire education, tools, and community.

We can break this fee into up to 4 monthly payments.

**Here's the reality...**

This is the deep-mechanics tier. You are paying for the layer beneath the bootcamp: the reasoning that determines why a level matters, why a setup qualifies, and why most traders take the same trade a step too early.

✓ 22 total hours of education across the bootcamp and the A.D.A.M. mentorship.

✓ Direct psychology instruction from a top-ranked FTMO trader.

✓ Indicators plus AI analysis systems, used with your own discernment.

**Plus: Your Customized Risk Management Plan**

When you join, you'll also get a Customized Risk Management Plan (normally a $997 value) tailored to the exact size of the prop firm account you're trading, your risk tolerance, and your current skill level. This isn't generic theory. This is a day-by-day blueprint showing you exactly how much to risk, when to step back, and how to structure your trades so you protect your capital while accelerating your path to payouts. One of the biggest reasons traders fail funded challenges is poor risk management. Blow-ups don't happen because you don't know entries. They happen because you don't have a plan. With this bonus, you go into the market every single day with confidence, discipline, and clarity.

## What Happens After Mentorship Together?

At the end of the self-guided education, a few different paths are possible...

- You could take NO action on the knowledge and achieve NO results. The statistics say that 85% of people who buy online mentorships never complete them. We don't recommend you decide to be in that category. The skills we teach can change your life if you take consistent action and keep showing up for yourself.
- You take the education and apply it to the market consistently, show up and ask questions, gaining more and more clarity through market experience, slowly transforming yourself into the trader you set out to become.
- You take MASSIVE action. Show up daily, ask questions, backtest the concepts until your eyes bleed to gain maximum confidence and clarity in the mechanics, and become one of our top mentees. Regardless, you emerge from the other side with high-level trading education and a community of like-minded individuals who will help keep you accountable on your journey.

If you're ready, then I'm ready and more than excited to work with you.

## Before You Pay Me Anything

I don't want your money if it is going to stress you out.

Stressful financial situations and trading do not mix. The odds in this business are already stacked against you. That is simply the truth of it, and paying with money you cannot afford to lose stacks them higher still. Every position you take afterward carries the weight of needing it to work. That is the exact condition under which traders oversize, hold losers, cut winners early, and revenge trade. I have watched it happen to people who had real talent.

Trading from a place of scarcity and lack does not work. The reason is mechanical rather than motivational: money you need back by a certain date forces decisions the market will not cooperate with. The market does not know your bills and does not care about your timeline.

So take your time with this decision. Go pray about it. Write it down and sleep on it. Talk it through with your spouse or partner. Anyone building something serious should be able to discuss a real expense with the person they share a life with, and if you cannot, that is worth sorting out first. None of that is weakness. It is the same deliberate judgment this education is trying to build in you, and I would rather you practice it here than learn it

with a live account.

There is no discount for deciding today and no penalty for deciding next quarter. If the money is not there right now, the honest answer is to save it. Keep studying on paper, keep building your foundation, and come back when paying for this changes nothing about how you sleep at night. That costs you nothing but time, and it will still be here.

Come in because you are ready and it is comfortable. Do not come in desperate, hoping this fixes something.

## Ready To Join?

**You can join directly from the site — there is no need to message anybody first.** The enrolment page carries the same price and the same terms as this document, takes payment through our processor, and opens your access and your community channels as soon as it clears.

**https://thealgovision.com/adam**

Project A.D.A.M. — $5,000 lifetime access. Can be broken into up to four monthly payments.

If you would rather talk it through with a person first, message an admin and we will. Nothing about paying online removes that.

**- Jeffery Boston Weatherford**

### Important Risk Notice

Trading futures, foreign exchange, equities, and other leveraged instruments involves substantial risk and may not be suitable for every person. You may lose more than your initial investment.

All education, mentorship, community discussion, indicators, signals, tools, and materials associated with this program are provided for educational purposes only. Nothing here constitutes personalized financial advice, investment advice, or a solicitation to manage money on anyone's behalf.

Past performance is not indicative of future results. Any trade examples, risk-to-reward figures, payouts, rankings, backtests, simulations, or outcomes referenced in this document, whether achieved by the instructors or by other students, are illustrative only and do not guarantee that any individual will achieve similar results. Individual results vary and depend on skill, discipline, market conditions, and factors outside anyone's control.

No profit, funded-account, payout, income, or performance outcome is promised or implied. Every member remains solely responsible for their own trading decisions, research, technology, risk controls, legal obligations, account rules, and position sizing.
