The Money Train Mastery (Sniper Bootcamp)

with Jeffery Boston Weatherford

For struggling FX and Futures traders who want to pass their funded evaluations, compound personal accounts, and learn how to trade less and make more....

Why I Created The Money Train Mastery (Sniper Bootcamp)

- I created this program because I was tired of seeing good traders, hard-working traders, fail over and over again, not because they lacked talent, but because no one ever gave them the right framework.
- This bootcamp is about one thing: taking you from struggling trader to consistent sniper.
- Designed for struggling traders. This isn't fluff and it isn't theory. These are battle-tested principles developed over 6 years of live market trading, built for traders who "just can't pass."
- The precision of high RR trades. You'll learn how to identify, plan, and execute high-probability setups. That is the difference between chasing 1:2 RR trades and building around 1:5–1:10+ RR setups as your baseline.
- Mechanical execution. No more guessing, second-guessing, or letting emotions ruin good setups. You'll learn to trade like a machine.
- A custom trading plan built for you. You won't leave with generic rules. You'll leave with a tailored, step-by-step plan that fits your schedule, goals, and risk appetite.

Right now, you only need to focus on 2 things:

- A winning psychology that eliminates self-sabotage, so no more blowing accounts or second-guessing yourself.
- A precision trading framework that puts probability on your side, so you can hunt sniper setups instead of forcing entries.

That's it.

One optional point of context before we move on.

The two levers above, psychology and precision, are the entirety of what matters going forward. The program outlined in this document is the current framework built around them.

Separately, I've kept a short archived training available that reflects an earlier stage of this work. It is not part of this membership, and it is not required to apply what's outlined here. It contains concepts that were rarely taught publicly at the time and are still unfamiliar to most retail traders.

I archived it because access to better information was never the primary constraint. Even with uncommon knowledge, most traders still struggled to apply it consistently once real money and pressure were involved. It's preserved strictly as a reference, not a recommendation. It is a glimpse into the depth this work evolved from, and why edge alone eventually breaks down without regulation, structure, and execution stability. There are no upsells, no funnels, no follow-up sequences, and no continuation beyond that archive. Whether you review it or ignore it entirely, everything required to work toward passing funded challenges and scaling accounts is contained within the membership described here.

If that's you, here's what awaits you inside The Money Train Mastery (Sniper Bootcamp)

#1 Trading Psychology Enhancement

Our Neurotrader 2.0 training helps you isolate and eliminate the hidden pitfalls keeping you stuck. If you don't master your psychology, no strategy will save you.

This was built with insights from a top-ranked FTMO trader and is engineered to remove bad habits so you can trade with complete confidence.

#2 Advanced Precision Trading Education

9 hours of elite-level education condensed from over 10,000 hours of chart time. These mechanics are the backbone of the sniper trading setups this program is built around.

You'll learn how to structure asymmetric setups, so a single trade can cover multiple losses, and then some. That means less screen time, less stress, and a far more efficient use of risk.

#3 Exclusive Custom Indicators

You'll also get access to proprietary tools I use daily, designed to sharpen your edge and keep you mechanically precise.

No fluff. Just real, battle-tested indicators that simplify decision-making so you can focus on execution.

#4 Elite Trading Community

Trading can feel lonely. Sitting behind screens, battling doubt, wondering if you're the only one struggling. That ends here. You'll be plugged into an exclusive community of serious traders on the same mission as you. The truth? Success is contagious. Hang around 5 struggling traders, and you'll be the sixth. Hang around 5 traders doing the work, and you'll be the sixth. This community is built to elevate you every single day.

#5 Ongoing Mentor Support

Most trading "leaders" disappear after you send the payment. You never hear from them again. That doesn't happen here.

When you join, you get direct access to active mentorship, so you always have clarity on what to do next. We answer questions. We bring clarity when confusion hits. We make sure you understand the education deeply enough that executing with confidence becomes second nature.

The Duration

It is self-guided, so it can be as long or as short as you make it. However, we do recommend you take AT LEAST a week to study each concept before moving on to the next, and that you stay on paper trading accounts until you gain absolute confidence in the mechanics taught.

The Investment

Just $997 per year for access to the entire education, the community, and AI signals for Gold.

Here's the reality...

Most traders never fail for lack of information. They fail because they never built a framework, never sized correctly, and never gave a real process enough time to work. This program is designed to attack that directly.

- ✓ Build a repeatable framework instead of a collection of unrelated setups.
- ✓ Learn to size and manage risk so a bad week doesn't end your account.
- ✓ Develop the psychology to execute the plan you already know is correct.

Plus: Your Customized Risk Management Plan

When you join, you'll also get a Customized Risk Management Plan (normally a $997 value) tailored to the exact size of the prop firm account you're trading, your risk tolerance, and your current skill level. This isn't generic theory. This is a day-by-day blueprint showing you exactly how much to risk, when to step back, and how to structure your trades so you protect your capital while accelerating your path to payouts. One of the biggest reasons traders fail funded challenges is poor risk management. Blow-ups don't happen because you don't know entries. They happen because you don't have a plan. With this bonus, you go into the market every single day with confidence, discipline, and clarity.

What Happens After Mentorship Together?

At the end of the self-guided education, a few different paths are possible...

- You could take NO action on the knowledge and achieve NO results. The statistics say that 85% of people who buy online mentorships never complete them. We don't recommend you decide to be in that category. The skills we teach can change your life if you take consistent action and keep showing up for yourself.
- You take the education and apply it to the market consistently, show up and ask questions, gaining more and more clarity through market experience, slowly transforming yourself into the trader you set out to become.
- You take MASSIVE action. Show up daily, ask questions, backtest the concepts until your eyes bleed to gain maximum confidence and clarity in the mechanics, and become one of our top mentees. Regardless of which level of action you take, you'll come out of this program with access to high-level trading education, a community of like-minded snipers who keep you accountable, and the precision skills to execute week after week.

If you're ready, then I'm ready, and more excited than ever to work with you.

Before You Pay Me Anything

I don't want your money if it is going to stress you out.

Stressful financial situations and trading do not mix. The odds in this business are already stacked against you. That is simply the truth of it, and paying with money you cannot afford to lose stacks them higher still. Every position you take afterward carries the weight of needing it to work. That is the exact condition under which traders oversize, hold losers, cut winners early, and revenge trade. I have watched it happen to people who had real talent.

Trading from a place of scarcity and lack does not work. The reason is mechanical rather than motivational: money you need back by a certain date forces decisions the market will not cooperate with. The market does not know your bills and does not care about your timeline.

So take your time with this decision. Go pray about it. Write it down and sleep on it. Talk it through with your spouse or partner. Anyone building something serious should be able to discuss a real expense with the

person they share a life with, and if you cannot, that is worth sorting out first. None of that is weakness. It is the same deliberate judgment this education is trying to build in you, and I would rather you practice it here than learn it

with a live account.

There is no discount for deciding today and no penalty for deciding next quarter. If the money is not there right now, the honest answer is to save it. Keep studying on paper, keep building your foundation, and come back when paying for this changes nothing about how you sleep at night. That costs you nothing but time, and it will still be here.

Come in because you are ready and it is comfortable. Do not come in desperate, hoping this fixes something.

Ready To Join?

You can join directly from the site — there is no need to message anybody first. The enrolment page carries the same price and the same terms as this document, takes payment through our processor, and opens your access and your community channels as soon as it clears.

https://thealgovision.com/bootcamp

The Money Train Mastery — $997 per year. $997 per year for the entire education, the community, and AI signals for Gold.

If you would rather talk it through with a person first, message an admin and we will. Nothing about paying online removes that.

Important Risk Notice

Trading futures, foreign exchange, equities, and other leveraged instruments involves substantial risk and may not be suitable for every person. You may lose more than your initial investment.

All education, mentorship, community discussion, indicators, signals, tools, and materials associated with this program are provided for educational purposes only. Nothing here constitutes personalized financial advice, investment advice, or a solicitation to manage money on anyone's behalf.

Past performance is not indicative of future results. Any trade examples, risk-to-reward figures, payouts, rankings, backtests, simulations, or outcomes referenced in this document, whether achieved by the instructors or by other students, are illustrative only and do not guarantee that any individual will achieve similar results. Individual results vary and depend on skill, discipline, market conditions, and factors outside anyone's control.

No profit, funded-account, payout, income, or performance outcome is promised or implied. Every member remains solely responsible for their own trading decisions, research, technology, risk controls, legal obligations, account rules, and position sizing.
